All the files needed for this unit are in this folder. The first document you should look at is

Python Next Steps Teaching Guide.docx

This tells you about the unit and includes the detailed lesson plans for each lesson.

There are several Python programs included in the lesson folders. To run a program, for example password.py, right-click the filename in the folder and select "Edit with IDLE".

You may wish to copy the files from the unit onto a shared network drive where pupils can access the presentations, worksheets and links. Remember to remove any documents you may prefer them not to access immediately such as the solutions to some of the worksheets or programming exercises.

For assessment, pupils may upload the Assessment Portfolio to an area for teacher assessment online. This could be an MLE such as Fronter, Frog, SharePoint or Moodle.

If you have any difficulty opening any of the files, which were all created in Office 2016, or experience any other problems, please email support@pgonline.co.uk.

Thank you for purchasing Introduction to Python. We hope you will find it useful.

We would greatly appreciate your feedback once you have had a chance to use the material! Please send an email to support@pgonline.co.uk.
